iTunes Music Store Sales & Customer Analytics

Prepare By :- Krishna Vekariya

Role: Data Analyst | **Tools:** MySQL, Power BI

Project Objective

This comprehensive business intelligence project analyzes the iTunes Music Store database to generate actionable insights for strategic decision-making.

Customer Behavior

Analyze purchasing patterns and multi-genre preferences

Product Performance

Evaluate track, album, and genre revenue contributions

Regional Patterns

Identify geographic revenue distribution and market opportunities

Employee Impact

Assess sales representative portfolio performance

Dataset Overview

Database Structure

The analysis leverages 11 relational tables that capture the complete music store ecosystem from artists to invoices.

Key Entities: Customer, Invoice, Track, Album, Artist, Genre, Employee

Relationship Flow: Artist → Album → Track → Invoice Line

Customer Analytics Insights

customer_name	total_spent
František Wichterlová	144.54
Helena Holý	128.70
Hugh O'Reilly	114.84
Manoj Pareek	111.87
Luís Gonçalves	108.90
Fernanda Ramos	106.92

100%

Multi-Genre Buyers

All customers purchase across multiple music genres

132

Average Days Between Purchases

Typical purchase gap indicates opportunity for engagement

$7.67

Average Order Value

Standardized pricing creates consistent revenue patterns

Geographic Insight: USA has highest customer base, followed by Canada and Brazil.

Revenue Trends

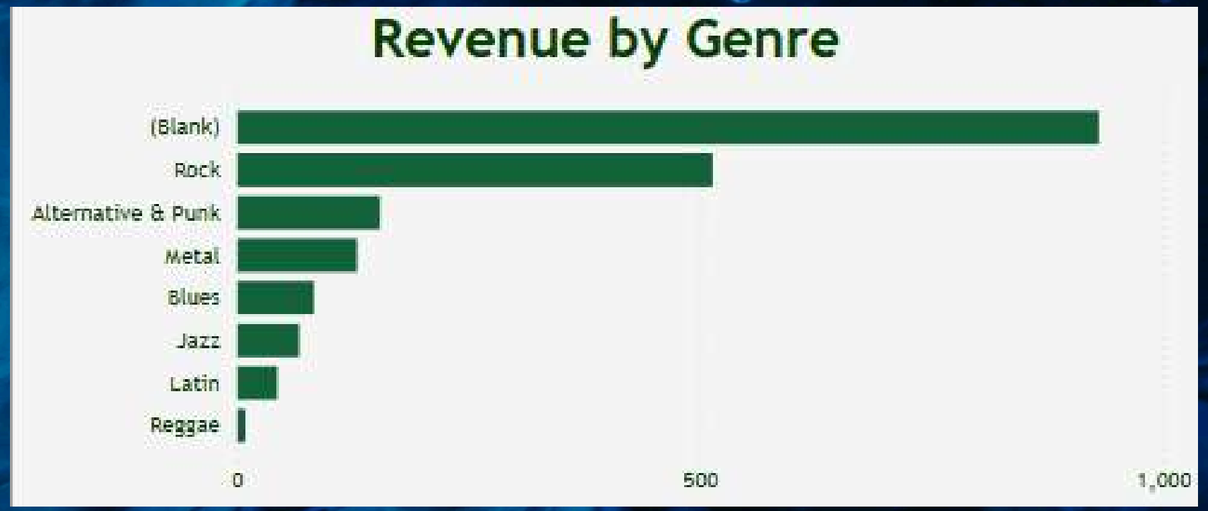
Monthly Revenue Pattern

Revenue peaks early in the year, with gradual decline through Q4. Seasonal patterns suggest promotional opportunities during slower periods.

Top Markets: USA leads with significant revenue, followed by Canada as the second strongest market.

month	revenue
2017-01	126.72
2017-02	141.57
2017-03	103.95
2017-04	142.56
2017-05	104.94
2017-06	75.24

Genre Performance Analysis



Key Findings

- **Rock dominates** with $15,649 revenue, driven by volume at standardized $0.99 pricing
- **Latin shows oversupply** vs demand—opportunity to optimize catalog
- Bottom genres (Hip Hop/Rap, Classical) generate under $800 combined
- Top 5 genres capture 92% of total revenue

genre	track_name	purchases	genre_rank
Rock	Are You Experienced?	14	1
Rock	Highway Chile	14	1
Jazz	"Das Lied Von Der Erde	8	1
Metal	Radio/Video	12	1
Alternative & Punk	Last Chance	10	1
Blues	Sunshine Of Your Love	5	1

Product Performance Rankings

Top Track: "War Pigs"

Black Sabbath's iconic track leads sales with highest individual purchase volume

Top Album: "Are You Experienced?"

Jimi Hendrix's groundbreaking debut album generates strongest album-level revenue

Product Optimization Needed

Several tracks and albums show zero sales—opportunity to remove or promote

Artist & Employee Performance

artist_name	total_revenue
Jimi Hendrix	185.13
Queen	179.19
Red Hot Chili Peppers	128.70
Nirvana	128.70
Pearl Jam	124.74

employee_id	support_rep	region	total_revenue
4	Margaret Park	USA	497.97
3	Jane Peacock	Canada	373.23
5	Steve Johnson	USA	337.59
3	Jane Peacock	USA	204.93
3	Jane Peacock	Germany	167.31
5	Steve Johnson	Germany	167.31

Top 5 Grossing Artists

1. **Jimi Hendrix** – Highest revenue across catalog
2. **Queen** – Strong consistent sales
3. **Red Hot Chili Peppers** – Mid-tier performer
4. **Nirvana** – Classic catalog appeal
5. **Pearl Jam** – Steady revenue contributor

Employee Insights

- **Margaret Park** manages highest revenue portfolio
- **Average 14.75 customers per sales representative**
- Employee assignments show geographic clustering
- Revenue varies significantly by portfolio composition

Geographic Market Analysis

USA: Highest Revenue Region

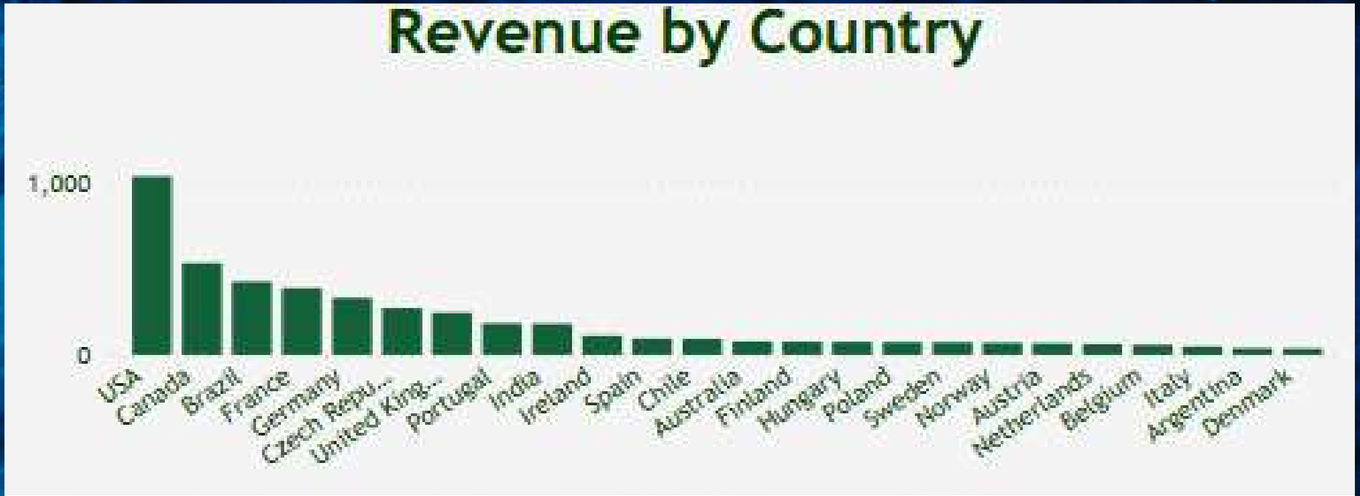
Strong customer base and consistent purchasing across all genres

Regional Genre Preferences

Distinct genre preferences by region—targeted marketing opportunities

Canada: Under-Monetized

Second-largest market with untapped revenue potential



Business Recommendations

Expand High-Performing Genres
Invest in Rock and Latin catalog to capitalize on existing demand

Optimize Underperforming Catalog
Remove or promote unsold tracks to reduce overhead and improve margins

Regional Targeted Marketing
Leverage genre preferences by region for personalized campaigns

Bundle Pricing Strategy
Introduce album bundles to increase average order value beyond $7.67

Focus on High-Value Markets
Prioritize USA and Canada while exploring underdeveloped regions

Conclusion: Data-driven strategy can enhance revenue growth and customer lifetime value through targeted product optimization and geographic expansion.
